

- linting and code style enforcement (may happen in pipeline and/or in editor)
 - Team may go with editor
- code quality via tool (ex. Codeclimate, Codacy, etc.)
 - Will use Code Climate to maintain code quality <https://codeclimate.com/>
- code quality via human review (ex. Pull Requests)
 - Pull requests will highlight any issues found in the code base
- unit tests via automation (ex. Jest, Tape, Ava, Cypress, Mocha/Chai, etc.)*
 - Unit test via Jest <https://jestjs.io/en/>
- documentation generation via automation (ex. JSDocs)
 - <https://jsdoc.app/>
