January 30, 2021 7:00 P.M - 9:00 P.M PST
Attendees: No absences, all present

How to split roles? Front / Back end, UI(majorly JS), coordinator, documentor, presenter

Process: UI & Function -> HTML (MVP) -> JS (good looking)

Roles:
Documentor - Yolanda
Presenter/Coordinator - Kevin

Front-end:
   -   Stuart
   -   Guo Cheng
   -   Bo Yang

Back-end:
   -   Ethan
   -   Jiahang
   -   Jiaming

(Add QA roles later on)

Kevin:
   -   Used to mostly developing backend, can do front-end as well however
   -   Experience in businesses presentations, has led marketing teams and investment
       groups before

Yichen (Stuart)
   -   Most experience in frontend, majorly on functionality (HTML+JS), instead of UI (CSS)
   -   Like digital art (illustration & photography)

Ethan
   -   Prefer backend but few experience, can do front end as well

Guo Cheng:
   -   More experience in back end and used to that but prefer front end and visual design
       even with very limited experience in it

Jiahang Li
   -   Prefer backend using Python. Have had experience in backend with Python using sanic
       and flask.

- Use Python to complete both frontend and backend in a project, but mainly depended on a specific software which may not be used generally in our project
- A little knowledge about JS and HTML.

Yolanda:
- HTML, CSS, Javascript (not very familiar with it)
- Documentor

Bo Yang :
- A little experience in the frontend. My preferences would be frontend and backend.

Jiaming Li:
   Prefer back end and testing stuff, little experience on UI design and front end but willing to learn
